www.SaferWheelchairs.com

Unlike a traditional anti-rollback device which prevents the wheelchair user from ever rolling backwards, Safer Locks only automatically engage the wheels as the user stands from the wheelchair or while the wheelchair is unoccupied, ensuring that the wheels are always locked during transfers. Our exclusive design gives the user the ability to continue rolling the chair in either direction while retaining all normal operation; acting as an anti-rollback only when needed.

THE SAFER LOCK DIFFERENCE

	BOLT-ON DESIGN	<ul style="list-style-type: none"> • Simple installation on a variety of leading wheelchair makes and models • No special tools required • Easily removed if needed
	NORMAL OPERATION	<ul style="list-style-type: none"> • Wheelchair continues to fold as normal • User can continue to propel wheelchair in either direction when safely seated • Does not effect the wheelchairs manufacturers warranty
	HUB LOCKING	<ul style="list-style-type: none"> • No easily damaged exposed parts • No premature wear on wheelchair tires • Positive Locking- When locks engage, wheels lock in both directions
	OVERRIDE HANDLES	Allows for caregivers to disengage the wheel locks for rolling the wheelchair when unoccupied and for easy transport
	MAINTENANCE	No additional maintenance or adjusting once properly installed
	WARRANTY	Unmatched TWO YEAR WARRANTY from date of purchase
	MADE IN THE USA	Manufactured, assembled & serviced at our Jackson, Mississippi location
